COVER STORY

Diesel Engines with Ultra Low Emissions for the USA

4

The **Emissions Standards in the USA** are the strictest in the world and place high demands on **Diesel Engine** development. Both Volkswagen and Mercedes-Benz have extensively further developed their diesel engines especially for this market and present the in-cylinder measures required and the corresponding exhaust aftertreatment systems.

COVER STORY

Emissions:

- 4** **Bluetec – The Concept for Diesel Engines with Lowest Emissions**

Joachim Schommers, Andreas Zygan, Ralf Binz, Dietmar Eckert, Markus Paule, Stephan Reichel, Karl-Heinz Kempka

- 12** **Volkswagen's New 2.0 l TDI Engine for the Most Stringent Emission Standards – Part 1**

Jens Hadler, Falko Rudolph, Richard Dorenkamp, Hartmut Stehr, Jürgen Hilzendege, Sebastian Kranzusch

DEVELOPMENT

Alternative Drives:

- 20** **The Turbosteamer – A System Introducing the Principle of Cogeneration in Automotive Applications**

Raymond Freymann, Wolfgang Strobl, Andreas Obieglo

Valve Train:

- 28** **Variable Valve Timing for any Engine Concept**

Falk Schneider, Markus Lettmann

Measuring Techniques:

- 32** **Compact Indicating Measurement Systems for Combustion Development**

Stefan Brugger, Gernot Fernitz, Peter Gutmann, Josef Moik, Peter Mathis, Martin Rzehorska

RESEARCH

Lubricants:

- 38** **Engine Oil-derived Emissions and their Balance for the DI Diesel Engine**

Yves Rosefort, Peter Mauermann, Ulrich Grütering, Stefan Pischinger

Materials:

- 46** **Technology Potential of Ceramic Piston Pins**

Ulrich May, Frank Stromberger, Jan Kohl, Jürgen Schubert, Karl Berroth, Andreas Kailer
